SUMMARY

Front-End Developer with 5+ years of experience building production-grade web applications with React, Next.js, and TypeScript. Experienced in developing AI-powered products, real-time interfaces, interactive dashboards, multilingual applications, and B2B/B2C e-commerce platforms. Strong background in front-end architecture, state management, testing, accessibility, and delivering complex features from development through production.

EXPERIENCE

Part Artificial Intelligence Research Center — Front-End Developer, On-site

Tehran, Tehran
Dec 2023 - Present

- Owned and developed front-end architecture across four AI-powered products (Atlas, “DanaBot”, Avanegar, and Avasho), establishing reusable patterns for scalable feature development and cross-product consistency.
- Built Atlas, a video analytics management platform featuring camera configuration, operational dashboards, interactive SVG tools for line- and polygon-based processing rules, and multilingual RTL/LTR support across Persian, English, and Arabic.
- Contributed to a 40-file Jest and React Testing Library test suite for Atlas, covering camera management, analytics rules, pagination, URL state synchronization, and geometric validation.
- Developed Avanegar’s real-time speech-to-text interface using Socket.IO and RecordRTC, supporting live audio streaming, microphone recording, file uploads, timestamp-based transcript review, and downloadable text and subtitle outputs.
- Developed Avasho’s text-to-speech workflows with text and TXT/DOCX inputs, speaker selection, character-based pricing, interactive audio waveform playback, output archives, wallet management, and OTP-based authentication.
- Developed DanaBot, a SaaS chatbot management platform with knowledge-base ingestion, conversation analytics, subscription management, embeddable integrations, and a visual workflow builder using React Flow.

POMECHAIN (B2C, B2B E-Commerce) — Front-End Developer, Remote

Dubai, United Arab Emirates
Mar 2022 - Nov 2023

- Contributed to the front-end redesign of the company’s e-commerce platform and administration panel using React and Next.js, helping improve usability and contributing to a 20% increase in user retention.
- Developed the “JomlahBazar” marketplace as part of the front-end team, delivering the project from development through production release within eight months.
- Integrated product search and filtering using Algolia and Azure Cognitive Search to improve product discovery and search relevance.

Freelance Front-End Developer, Remote

Jun 2020 - Feb 2022

- Delivered freelance front-end projects while preparing for graduate studies, building responsive web interfaces and integrating REST APIs using JavaScript and React.

Webartma — Front-End Developer, On-site

Ahvaz, Khuzestan
Jun 2019 - May 2020

- Developed and maintained responsive web applications with a focus on usability, cross-browser compatibility, and front-end performance.
- Integrated RESTful APIs and contributed to feature development, debugging, and performance optimization in collaboration with back-end developers.

EDUCATION

Shahid Rajaee University (Tehran, Tehran)

Oct 2021 - Sep 2024

- Master's degree, Computer Software Engineering

Shahid Chamran University (Ahvaz, Khuzestan)

Jan 2016 - Jan 2021

- Bachelor's degree, Computer Engineering

SKILLS

Languages: Persian (Native), English (Upper Intermediate)

Core Technologies: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Libraries & Tools: TanStack Query (React Query), Zustand, Tailwind CSS, shadcn/ui, React Hook Form, Zod, Jest, React Testing Library, React Flow, Storybook

Development: Git, Docker, CI/CD, Vite, ESLint, Prettier, pnpm

Expertise: Component-Based Architecture, Performance Optimization, Accessibility, Responsive Design, Internationalization (i18n), REST APIs, WebSocket, Real-Time Interfaces, SOLID Principles
